GRUNDFOS REPAIR FOR ME IS **MINIMISED PRODUCTION DOWNTIME**

Is extended downtime simply not an option for you?

If pumps break down, it is often a matter of great importance to get them up and running again, fast. At Grundfos, we know pumps better than anyone, and we can help you with any repair need of any pump from any manufacturer.

We offer both on-site and workshop repairs depending on your specific needs.

GRUNDFOS REPAIR

Grundfos On-site Repair is the fast and efficient way to keep disruptions and expenditure to a minimum and the ultimate repair solution for critical applications where extended downtime is simply not an option.

Workshop Repair is a highly flexible, experienced and competent one-stop shop for all your pump repair needs, carried out at a Grundfos workshop, making a broader range of repair options and personnel available.

Grundfos Workshop Repair includes troubleshooting, suggestion for replacement of spare parts, assembly and testing. You get the same high-quality repair for Grundfos as well as non-Grundfos products.

All repair work is carried out according to Grundfos specifications and using original spare parts, ensuring your product warranty is still valid following the repair work.

Benefits of Grundfos Repair

- All repair work carried out according to highest Grundfos standards
- Original Grundfos Spare Parts used
- Valid warranty
- Overall system evaluation for reliable operation

GRUNDFOS REPAIR IN A FEW SIMPLE STEPS

1. In consultation with you, we determine whether your pumps should be repaired on-site or sent to the workshop
2. Grundfos specialists carry out the repair, using original spare parts, on the agreed time and place
3. We follow up on our service
