GRUNDFOS

Possibility in every drop

Be prepared.
Act fast.
Minimise damage.

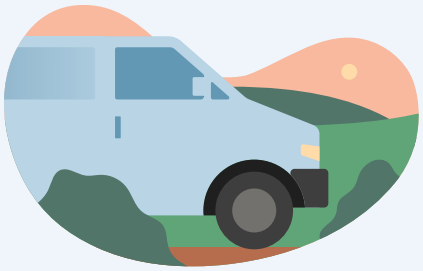
Flash floods and urban flooding events are becoming more common.[1] They can cause significant damage to properties and disrupt lives. With the Grundfos MULTIBOX, you're ready to tackle any flooding emergency quickly and efficiently. Designed for professional installers, MULTIBOX is a complete solution to protect your customers' homes and businesses.

Everything you need in one box

- **UNILIFT CC dirty-water pump**
  Reliable and efficient, capable of handling dirty water with ease.
- **15m pressure hose**
  Equipped with stainless steel kink protection for durability and flexibility.
- **Integrated check valve**
  Prevents backflow, ensuring smooth operation.
- **Multi-sized adapter**
  Allows for easy connections to various pipe sizes.
- **10m cable**
  Ready for immediate use, providing ample reach for different scenarios.

Much less to mop up

Remove UNILIFT CC's strainer and pump down to a water level of 3 mm – saving you having to mop up the equivalent of two 6-person hot tubs.[2]



Ready to protect your customers?

Don't wait until the next flood – be prepared with the Grundfos MULTI-BOX. Just visit our website or contact your local Grundfos sales representative to get started.

[2] By removing UNILIFT CC's strainer, the water level can be pumped down to 3 mm; most other pumps can only pump down to 3 cm. In a 100 m² area this equates to 2,700 litres less water needing to be removed manually.
