MAGNA3

Enviromental Product Declaration

When designing HVAC systems for sustainable buildings, access to objective, verifiable data from an EPD is essential to achieving building certification such as BREEAM or LEED.

Grundfos is a global leader of energy-efficient water solutions for use in homes, buildings, industries, utilities and agriculture. As part of our commitment to sharing transparent, unbiased data on our products' environmental impact, we're proud to offer EPD declaration on MAGNA3.

In accordance with ISO 14025 and the EN 15804 standard, the EPDs specify quantitative, objective and third-party verified information about the entire life cycle of the MAGNA3 pumps, from raw material extraction to end-of-life. Access EPDs for each MAGNA3 model below.
