

SPK

Installation and operating instructions

English (GB) Installation and operating instructions

Original installation and operating instructions

These installation and operating instructions describe Grundfos SPK pumps.

Sections 1-3 give the information necessary to be able to unpack, install and start up the product in a safe way.

Sections 4-9 give important information about the product, as well as information on service, fault finding and disposal of the product.

Read this document before installing the product. Installation and operation must comply with local regulations and accepted codes of good practice.

1. General information

1.1 Hazard statements

The symbols and hazard statements below may appear in Grundfos installation and operating instructions, safety instructions and service instructions.

DANGER

Indicates a hazardous situation which, if not avoided, will result in death or serious personal injury.

WARNING

Indicates a hazardous situation which, if not avoided, could result in death or serious personal injury.

CAUTION

Indicates a hazardous situation which, if not avoided, could result in minor or moderate personal injury.

The hazard statements are structured in the following way:

SIGNAL WORD

Description of hazard

Consequence of ignoring the warning.
- Action to avoid the hazard.

1.2 Notes

The symbols and notes below may appear in Grundfos installation and operating instructions, safety instructions and service instructions.

Observe these instructions for explosion-proof products.

A blue or grey circle with a white graphical symbol indicates that an action must be taken.

A red or grey circle with a diagonal bar, possibly with a black graphical symbol, indicates that an action must not be taken or must be stopped.

If these instructions are not observed, it may result in malfunction or damage to the equipment.

Tips and advice that make the work easier.

2. Installing the product

2.1 Mechanical installation

WARNING

Moving parts

- Death or serious personal injury
- Tighten the coupling screws to the correct torque.
 - Install the coupling guards securely to the pump with the screws intended for this purpose.

CAUTION

Hot surface

- Minor or moderate personal injury
- The pump must be installed so that persons cannot accidentally come into contact with the hot surface of the motor.

2.1.1 Pump location

The pump is designed for tank mounting in vertical position. The pump is positioned in a hole cut into the cover of the tank (upper side) and is secured to the tank by four hexagon head screws through the holes in the mounting flange. We recommend to fit a sealing gasket between the pump flange and tank. If the pump is to be installed horizontally, the drain hole of the motor stool must be fitted with a plug.

Fig. 1

Pump mounting flange dimensions:

Pump type	D1	D2	D3	L	C	X
SPK 1, 2 and 4	100	115	130	64	Rp 3/4	Ø7.5
SPK 8	140	160	180	100	Rp 1 1/4	Ø7.5

2.1.2 Inlet conditions

The bottom of the pump strainer must be at least 25 mm above the bottom of the tank.

The pumps are designed to provide full performance down to a level of A mm above the bottom of the strainer.

At a liquid level between A and B mm above the bottom of the strainer, the built-in priming screw will protect the pump against dry running.

Pump type	A [mm]	B [mm]
SPK	40	25

Fig. 2

TM07 2804 4118

TM00 4375 5298

2.2 Electrical connection

WARNING

Electric shock

Death or serious personal injury

- Before starting any work on the product, make sure that the power supply has been switched off and that it cannot be accidentally switched on.
- Connect the pump to an external main switch close to the pump and to a motor-protective circuit breaker or a CUE frequency converter. Make sure you can lock the main switch in OFF position (isolated). Type and requirements as specified in EN 60204-1, 5.3.2.

The operating voltage and frequency are marked on the pump nameplate. Please make sure that the motor is suitable for the power supply on which it will be used.

Single-phase Grundfos motors incorporate a thermal overload switch and require no additional motor protection.

Three-phase motors must be connected to a motor starter.

The terminal box can be turned to four positions, in 90° steps, see fig. 3.

Proceed as follows:

1. Remove the coupling guards. Do *not* remove the coupling.
2. Remove the four bolts securing the motor to the motor stool.
3. Turn the motor to the required position.
4. Replace and tighten the four bolts.
5. Replace the coupling guards.

The electric motor must be connected to the supply as shown in the diagram inside the terminal box cover.

Fig. 3

TM00 4257 2294

3. Starting up the product

WARNING

Too high pressure and leakage

Death or serious personal injury

- Do not run the pump against a closed outlet valve for more than approx. 5 minutes.

Before starting the pump, make sure:

- that all pipe connections are tight.
- that the pump body is partly filled with liquid (partly submerged).
- that the strainer is not blocked by impurities.

Start the pump as follows:

1. Close the isolating valve on the outlet side of the pump.
2. If the pump is fitted with a vent valve, this valve must be opened, see fig. 4.

Fig. 4

3. See the correct direction of rotation of the pump on the motor fan cover. When seen from the top, the pump must rotate *counterclockwise*.
 4. Start the pump and check the direction of rotation.
 5. Open the outlet isolating valve a little.
 6. If the pump is fitted with a vent valve, this valve must be closed when a steady stream of liquid runs out of it.
 7. Completely open the outlet isolating valve.
- The pump has now been vented and is ready for operation.

TM01 6428 2399

4. Product introduction

4.1 Applications

The Grundfos pumps, type SPK, are multistage centrifugal pumps designed for pumping liquids for machine tools, condensate transfer, liquid transfer in industrial washing machines and similar applications.

WARNING

Fire and explosion

- Death or serious personal injury
- Do not use the pump for flammable, combustible or explosive liquids.

The pumps are designed for pumping liquids with a density and viscosity corresponding to those of water. The pumped liquid must not contain abrasive particles or fibres.

When pumping liquids with a density or viscosity higher than that of water, the motor size must be taken into consideration.

4.2 Identification

The standard range of pumps encompasses complete impeller-in-chamber combinations.

Depending on duty combinations, other lengths can on request be supplied by fitting empty intermediate chambers instead of standard chambers with impellers.

The pump key on the pump nameplate indicates the number of chambers and impellers fitted to the pump.

4.3 Pump key

Example **SPK 4 - 16 / 2 -x -x -x -xxxx**

Pump range	SPK	4	-	16	/	2	-	x	-	x	-	x	-	xxxx
Nominal flow rate in m ³ /h														
Number of stages														
Number of impellers														
Code for pump version														
Code for pipe connection														
Code for materials														
Code for shaft seal and rubber pump parts														

5. Servicing the product

WARNING

Electric shock

- Death or serious personal injury
- Before starting any work on the product, make sure that the power supply has been switched off and that it cannot be accidentally switched on.

WARNING

Moving parts

- Death or serious personal injury
- Tighten the coupling screws to the correct torque.
 - Install the coupling guards securely to the pump with the screws intended for this purpose.

CAUTION

Corrosive liquids

- Death or serious personal injury
- Wear personal protective equipment.

CAUTION

Toxic liquids

- Death or serious personal injury
- Wear personal protective equipment.

CAUTION

Hot or cold liquid

- Minor or moderate personal injury
- Wear personal protective equipment.

CAUTION

Hot or cold surface

- Minor or moderate personal injury
- Make sure that no one can accidentally come into contact with hot or cold surfaces.

5.1 Maintaining the product

Pumps installed in accordance with these instructions require very little maintenance.

The mechanical shaft seal is self-adjusting and has wear-resistant seal rings which are lubricated and cooled by the pumped liquid.

The pump bearings are also lubricated by the pumped liquid. The motor ball bearings are grease packed and sealed for life. No further lubrication is necessary.

Pumps from 4 kW and up have angular contact bearings.

5.1.1 Filters

Chip trays, filters, etc. must be cleaned at regular intervals to ensure a correct flow of liquid.

5.1.2 Periodic checks

At regular intervals, depending on the conditions and time of operation, the following checks should be made:

- Check the quantity of liquid and operating pressure.
- Check that there are no leaks.
- Check that the motor is not overheating.
- Check the tripping of the motor starter.
- Check that all controls are operating satisfactorily.

If the above checks do not reveal any abnormal operating details, no further checks are necessary.

Should any faults be found, check the symptoms with section [8. Fault finding the product](#).

5.2 Contaminated products

The product will be classified as contaminated if it has been used for a liquid which is injurious to health or toxic.

If you request Grundfos to service the product, contact Grundfos with details about the liquid before returning the product for service. Otherwise, Grundfos can refuse to accept the product for service.

Any application for service must include details about the liquid.

Clean the product in the best possible way before you return it.

Costs of returning the product are to be paid by the customer.

6. Taking the product out of operation

6.1 Taking the product permanently out of operation

CAUTION

Corrosive liquids

Death or serious personal injury
- Wear personal protective equipment.

CAUTION

Toxic liquids

Death or serious personal injury
- Wear personal protective equipment.

CAUTION

Hot or cold liquid

Minor or moderate personal injury
- Wear personal protective equipment.

CAUTION

Hot or cold surface

Minor or moderate personal injury
- Make sure that no one can accidentally come into contact with hot or cold surfaces.

7. Technical data

Pump type	SPK
Minimum liquid temperature [°C]	-10
Maximum liquid temperature [°C]	+90
Maximum ambient temperature [°C]	+40
Maximum operating pressure [bar]	10
Enclosure class	IP54

7.1 Sound pressure level

Motor [kW]	\bar{L}_{pA} [dB(A)]	
	50 Hz	60 Hz
0.06	< 70	< 70
0.12	< 70	< 70
0.18	< 70	< 70
0.25	< 70	< 70
0.37	< 70	< 70
0.55	< 70	< 70
0.75	< 70	< 70
1.1	< 70	< 70
1.5	< 70	71
2.2	< 70	71

8. Fault finding the product

WARNING

Electric shock

- Death or serious personal injury
- Before starting any work on the product, make sure that the power supply has been switched off and that it cannot be accidentally switched on.

WARNING

Moving parts

- Death or serious personal injury
- Tighten the coupling screws to the correct torque.
 - Install the coupling guards securely to the pump with the screws intended for this purpose.

CAUTION

Corrosive liquids

- Death or serious personal injury
- Wear personal protective equipment.

CAUTION

Toxic liquids

- Death or serious personal injury
- Wear personal protective equipment.

CAUTION

Hot or cold liquid

- Minor or moderate personal injury
- Wear personal protective equipment.

CAUTION

Hot or cold surface

- Minor or moderate personal injury
- Make sure that no one can accidentally come into contact with hot or cold surfaces.

Fault	Cause	Remedy
1. Motor does not run when started.	a) Supply failure.	Connect the power supply.
	b) Fuses are blown.	Replace fuses.
	c) Motor starter overload has tripped.	Reactivate the motor protection.
	d) Main contacts in motor starter are not making contact or the coil is faulty.	Replace contacts or magnetic coil.
	e) Control circuit is defective.	Repair the control circuit.
	f) Motor is defective.	Replace the motor.
2. Motor starter overload trips out immediately when supply is switched on.	a) One fuse/automatic circuit breaker is blown.	Cut in the fuse.
	b) Contacts in motor starter overload are faulty.	Replace motor starter contacts.
	c) Cable connection is loose or faulty.	Fasten or replace the cable connection.
	d) Motor winding is defective.	Replace the motor.
	e) Pump mechanically blocked.	Remove the mechanical blocking of the pump.
	f) Overload setting is too low.	Set the motor starter correctly.
3. Motor starter overload trips out occasionally.	a) Overload setting is too low.	Set the motor starter correctly.
	b) Low voltage at peak times.	Check the power supply.
4. Motor starter has not tripped but the pump does not run.	a) Check 1 a), b), d) and e).	
5. Pump runs but gives no liquid or pump capacity is not constant.	a) Pump strainer partly blocked by impurities.	Clean the strainer.
	b) Liquid level in tank too low.	Increase the liquid level.
	c) Pump rotates in the wrong direction.	Change the direction of rotation of the motor.

9. Disposing of the product

Disposal of this product must be carried out according to the following guidelines:

1. Use the local public or private waste collection service.
2. In case such waste collection service does not exist or cannot handle the materials used in the product, please deliver the product or any hazardous materials from it to your nearest Grundfos company or service workshop.

Declaration of conformity

GB: EU declaration of conformity

We, Grundfos, declare under our sole responsibility that the product SPK, to which the declaration below relates, is in conformity with the Council Directives listed below on the approximation of the laws of the EU member states.

DE: EU-Konformitätserklärung

Wir, Grundfos, erklären in alleiniger Verantwortung, dass das Produkt SPK, auf das sich diese Erklärung bezieht, mit den folgenden Richtlinien des Rates zur Angleichung der Rechtsvorschriften der EU-Mitgliedsstaaten übereinstimmt.

ES: Declaración de conformidad de la UE

Grundfos declara, bajo su exclusiva responsabilidad, que el producto SPK al que hace referencia la siguiente declaración cumple lo establecido por las siguientes Directivas del Consejo sobre la aproximación de las legislaciones de los Estados miembros de la UE.

FR: Déclaration de conformité UE

Nous, Grundfos, déclarons sous notre seule responsabilité, que le produit SPK, auquel se réfère cette déclaration, est conforme aux Directives du Conseil concernant le rapprochement des législations des États membres UE relatives aux normes énoncées ci-dessous.

IT: Dichiarazione di conformità UE

Grundfos dichiara sotto la sua esclusiva responsabilità che il prodotto SPK, al quale si riferisce questa dichiarazione, è conforme alle seguenti direttive del Consiglio riguardanti il riavvicinamento delle legislazioni degli Stati membri UE.

PL: Deklaracja zgodności UE

My, Grundfos, oświadczamy z pełną odpowiedzialnością, że nasz produkt SPK, którego deklaracja niniejsza dotyczy, jest zgodny z następującymi dyrektywami Rady w sprawie zbliżenia przepisów prawnych państw członkowskich.

RU: Декларация о соответствии нормам ЕС

Мы, компания Grundfos, со всей ответственностью заявляем, что изделие SPK, к которому относится нижеприведённая декларация, соответствует нижеприведённым Директивам Совета Евросоюза о тождественности законов стран-членов ЕС.

CZ: Prohlášení o shodě EU

My firma Grundfos prohlašujeme na svou plnou odpovědnost, že výrobek SPK, na který se toto prohlášení vztahuje, je v souladu s níže uvedenými ustanoveními směrnice Rady pro sblížení právních předpisů členských států Evropského společenství.

DK: EU-overensstemmelseerklæring

Vi, Grundfos, erklærer under ansvar at produktet SPK som erklæringen nedenfor omhandler, er i overensstemmelse med Rådets direktiver der er nævnt nedenfor, om indbyrdes tilnærmede til EU-medlemsstaternes lovgivning.

FI: EU-vaatimustenmukaisuusvakuutus

Grundfos vakuuttaa omalla vastuullaan, että tuote SPK, jota tämä vakuutus koskee, on EU:n jäsenvaltioiden lainsäädännön lähentämiseen tähtäävien Euroopan neuvoston direktiivien vaatimusten mukainen seuraavasti.

GR: Δήλωση συμμόρφωσης ΕΕ

Εμείς, η Grundfos, δηλώνουμε με αποκλειστική δική μας ευθύνη ότι το προϊόν SPK, στο οποίο αναφέρεται η παρακάτω δήλωση, συμμορφώνεται με τις παρακάτω Οδηγίες του Συμβουλίου περί προσέγγισης των νομοθεσιών των κρατών μελών της ΕΕ.

NL: EU-conformiteitsverklaring

Wij, Grundfos, verklaren geheel onder eigen verantwoordelijkheid dat product SPK, waarop de onderstaande verklaring betrekking heeft, in overeenstemming is met de onderstaande Richtlijnen van de Raad inzake de onderlinge aanpassing van de wetgeving van de EU-lidstaten.

PT: Declaração de conformidade UE

A Grundfos declara sob sua única responsabilidade que o produto SPK, ao qual diz respeito a declaração abaixo, está em conformidade com as Directivas do Conselho sobre a aproximação das legislações dos Estados Membros da UE.

SE: EU-försäkran om överensstämmelse

Vi, Grundfos, försäkrar under ansvar att produkten SPK, som omfattas av nedanstående försäkran, är i överensstämmelse med de rådsdirektiv om inbördes närmande till EU-medlemsstaternas lagsliffning som listas nedan.

- Machinery Directive (2006/42/EC).
Standard used: EN 809:1998, A1:2009.
- Ecodesign Directive (2009/125/EC).
Electric motors:
Commission Regulation No 640/2009.
Applies only to three-phase Grundfos motors marked IE2 or IE3.
See motor nameplate.
Standard used: EN 60034-30:2009.
- Ecodesign Directive (2009/125/EC).
Water pumps:
Commission Regulation No 547/2012.
Applies only to water pumps marked with the minimum efficiency index MEI. See pump nameplate.
- RoHS Directives: (2011/65/EU and 2015/863/EU)
Standard used: EN IEC 63000:2018

This EC/EU declaration of conformity is only valid when published as part of the Grundfos installation and operating instructions (96496967).

Declaration of conformity

UK declaration of conformity

We, Grundfos, declare under our sole responsibility that the product **SPK**, to which this declaration relates, is in conformity with UK regulations, standards and specifications to which conformity is declared, as listed below:

- Supply of Machinery (Safety) Regulations 2008
Standard used: EN 809:1998, A1:2009.
- The Ecodesign for Energy-Related Products and Energy Information Regulations 2019
Electric motors:
Regulation (EC) No 640/2009 and Regulation (EU) No 4/2014
Applies only to three-phase Grundfos motors marked IE2 or IE3.
See motor nameplate.
Standard used: EN 60034-30-1:2009.
- The Ecodesign for Energy-Related Products and Energy Information Regulations 2019
Water pumps:
Regulation (EU) No 547/2012.
Applies only to water pumps marked with the minimum efficiency index MEI. See pump nameplate.
- The Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2019
Standard used: EN IEC 63000:2018

This UK declaration of conformity is only valid when published as part of the Grundfos installation and operating instructions.

UK Importer: Grundfos Pumps Ltd. Grovebury Road, Leighton Buzzard, LU7 4TL.
