English (GB) Safety instructions and other important information

General information

These safety instructions give a quick overview of the safety precautions to be taken in connection with any work on this product.

Observe these safety instructions during handling, installation, operation, maintenance, service and repair of this product.

These safety instructions are a supplementary document, and all safety instructions will appear again in the relevant sections of the installation and operating instructions.

Keep these safety instructions at the installation site for future reference.

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.

Children shall not play with the appliance.

Cleaning and user maintenance shall not be made by children without supervision.

Operating conditions

Operating mode

The pumps are designed for intermittent operation (S3). When completely submerged, the pumps can also operate continuously (S1).

Installation depth

Maximum 10 m below liquid level.

Operating pressure

Maximum 6 bar.

Number of starts per hour

Maximum 30.

pH value

Pumps in permanent installations can be used for pumping liquids with a pH value between 4 and 10.

Liquid temperature

0–40 °C.

For short periods (maximum 10 minutes), a temperature of up to 60 °C is permissible. This applies for standard versions only.

Explosion-proof pumps must never pump liquids at a temperature higher than 40 °C.

Density of pumped liquid

When pumping liquids with a density and/or a kinematic viscosity higher than that of water, use motors with correspondingly higher outputs.

Sound pressure level

The sound pressure level of the pumps is lower than the limiting values stated in the EC Council Directive 2006/42/EC relating to machinery.

WARNING

Crushing hazard

Death or serious personal injury

- Do not stack pump packages or pallets on top of each other when lifting or moving them.
- Always lift the pump by its lifting bracket or by means of a forklift truck if the pump is fixed on a pallet. Never lift the pump by means of the power cable, hose or pipe.

CAUTION

Sharp element

Minor or moderate personal injury

- Make sure not to cut your hands on the sharp edges when opening the pump package.

DANGER

Electric shock

Death or serious personal injury

- It must be possible to lock the main switch in position 0. Type and requirements as specified in EN 60204-1, 5.3.2.

DANGER

Electric shock

Death or serious personal injury

- Make sure there are at least 3 m free cable above the maximum liquid level.

DANGER

Crushing hazard

Death or serious personal injury

- Make sure that the lifting bracket is tightened before attempting to lift the pump. Tighten if necessary.

CAUTION**Crushing of hands**

Minor or moderate personal injury

- Do not put your hands or any tool into the pump inlet or outlet port after the pump has been connected to the power supply, unless the pump has been switched off by removing the fuses or switching off the main switch.
- Make sure that the power supply cannot be accidentally switched on.

**CAUTION****Sharp element**

Minor or moderate personal injury

- Do not touch the sharp edges of the impeller, grinder head, and grinder ring without wearing gloves.

CAUTION**Biological hazard**

Minor or moderate personal injury

- Make sure to seal the pump outlet properly when fitting the outlet pipe, otherwise water might spray out of the sealing.

Pump installation in pits must be carried out by specially trained persons.

Work in or near pits must be carried out according to local regulations.

Lifting the product

WARNING**Crushing of hands**

Death or serious personal injury

- When lifting the pump, make sure your hand is not caught between the lifting bracket and the hook.

WARNING

Crushing hazard

Death or serious personal injury

- Make sure that the hook is fixed properly to the lifting bracket.
- Always lift the pump by its lifting bracket or by means of a forklift truck if the pump is fixed on a pallet.
- Never lift the pump by means of the power cable, hose or pipe.
- Make sure that the lifting bracket is tightened before attempting to lift the pump. Tighten if necessary.

Mechanical installation

DANGER

Electric shock

Death or serious personal injury

- Before beginning the installation, switch off the power supply and lock the main switch in position 0.
- Switch off any external voltage connected to the product before working on it.

CAUTION

Hot surface

Death or serious personal injury

- Make sure that the pump has cooled down before touching it.

DANGER

Electric shock

Death or serious personal injury

- Before installing the pump and starting it up for the first time, check the power cable for visible defects to avoid short circuits.

CAUTION

Biological hazard

Minor or moderate personal injury

- Flush the pump thoroughly with clean water and rinse the pump parts in water after dismantling.
- Pits for submersible sewage and wastewater pumps may contain sewage or wastewater with toxic and/or disease-causing substances.
- Wear appropriate personal protective equipment and clothing.
- Observe the local hygiene regulations in force.

Before beginning installation procedures, make sure that the atmosphere in the pit is not potentially explosive.

! Make sure the pit bottom is even before installing the product.

! Always use Grundfos accessories to avoid malfunctions due to incorrect installation.

! Only use the lifting bracket for lifting the pump. Do not use it to hold the pump when in operation.

! Make sure that the liquid entering the pit through the inlet does not cause water to be splashed on the sensors of the pump.

! Make sure that the pipes are installed without the use of undue force. No loads from the weight of the pipes must be carried by the pump.

 Do not use elastic elements or bellows in the pipes. Never use these elements as a means to align the pipes.

 When the pump has reached the auto-coupling base unit, shake the pump by means of the chain to make sure that it is placed in the correct position.

 The free end of the cable must not be submerged as water may penetrate through the cable into the motor.

 If several pumps are installed in the same pit, the pumps must be installed at the same level in order to allow optimum pump alternation.

Electrical connection

DANGER

Electric shock

Death or serious personal injury

- Connect the pump to an external main switch which ensures all-pole disconnection with a contact separation according to EN 60204-1, 5.3.2.
- It must be possible to lock the main switch in position 0. Type and requirements as specified in EN 60204-1, 5.3.2.

The classification of the installation site must be approved according to local rules in each individual case.

The CIU unit, if used, must not be installed in potentially explosive environments.

On explosion-proof pumps, make sure that an external earth conductor is connected to the external earth terminal of the pump using a conductor with a secure cable clamp. Clean the surface of the external earth connection, and fit the cable clamp.

The cross section of the earth conductor must be at least 4 mm², e.g. type H07 V2-K (PVT 90 °) yellow and green.

Make sure that the earth connection is protected from corrosion.

DANGER**Electric shock**

Death or serious personal injury

- If the power cable is damaged, it must be replaced by the manufacturer, his service agent or a similarly qualified person.

DANGER**Electric shock**

Death or serious personal injury

- Before installing the pump and starting it up for the first time, check the power cable for visible defects to avoid short circuits.

Do not run the pump via a frequency converter.

Make sure there are at least 3 m free cable above the maximum liquid level.

!

Set the motor-protective circuit breaker to the maximum current of the pump. The maximum current is stated on the pump nameplate.

!

Make sure that the pump is connected in accordance with the instructions given in this booklet.

Alarm relay or communication connection

If a CIU is connected, do not use a relay. CIU incorporates a relay which takes over the alarm function.

CAUTION

Crushing of hands

Minor or moderate personal injury

- Do not put your hands or any tool into the pump inlet or outlet port after the pump has been connected to the power supply, unless the pump has been switched off by removing the fuses or switching off the main switch.
- Make sure that the power supply cannot be accidentally switched on.

CAUTION

Biological hazard

Minor or moderate personal injury

- Make sure to seal the pump outlet properly when fitting the outlet pipe, otherwise water might spray out of the sealing.

WARNING

Crushing of hands

Death or serious personal injury

- When lifting the pump, make sure your hand is not caught between the lifting bracket and the hook.

DANGER

Crushing hazard

Death or serious personal injury

- Make sure that the hook is fixed properly to the lifting bracket.
- Always lift the pump by its lifting bracket or by means of a forklift truck if the pump is fixed on a pallet.
- Never lift the pump by means of the power cable, hose or pipe.
- Make sure that the lifting bracket is tightened before attempting to lift the pump. Tighten if necessary.

DANGER**Electric shock**

Death or serious personal injury

- Before starting up the product for the first time, check the power cable for visible defects to avoid short circuits.
- If the power cable is damaged, it must be replaced by the manufacturer, his service agent or a similarly qualified person.
- Make sure that the product is earthed properly.
- Switch off the power supply and lock the main switch in position 0.
- Switch off any external voltage connected to the product before working on it.

**CAUTION****Biological hazard**

Minor or moderate personal injury

- Flush the pump thoroughly with clean water and rinse the pump parts in water after dismantling.

Pits for submersible sewage and wastewater pumps may contain sewage or wastewater with toxic and/or disease-causing substances.

- Wear appropriate personal protective equipment and clothing.
- Observe the local hygiene regulations in force.

CAUTION**Hot surface**

Minor or moderate personal injury

- Do not touch the surface of the pump while the pump is running.

Before starting the product:

- Make sure that the fuses have been removed.
- Make sure that all protective equipment has been connected correctly.

Do not open the clamp while the pump is running.

Operating modes

Do not start the pump if the atmosphere in the pit is potentially explosive.

Startup

If the atmosphere in the pit is potentially explosive, use only pumps with Ex approval.

Before startup, check that the system has been filled with liquid and vented. The pump is self-venting.

The pump must not run dry.

In case of abnormal noise or vibrations from the pump, other pump failure or power supply failure, stop the pump immediately.

Do not attempt to restart the pump until the cause of the fault has been found and corrected.

Start and stop levels

The pump incorporates dry-running protection via two dry-running sensors placed on either side of the electronic unit. If the water level falls below a dry-running sensors, the pump will stop immediately, and it cannot restart until the sensors are fully submerged again.

The sensors must be cleaned at regular intervals, depending on the deposits of sludge on the sensors in the pit.

Potentially explosive environments

The pumps must under no circumstances pump combustible or flammable liquids.

The classification of the installation site must be approved according to local rules in each individual case.

The letter X in the certificate number indicates that the equipment is subject to special conditions for safe use. The conditions are mentioned in the certificate and in these installation and operating instructions.

Special conditions for safe use of explosion-proof pumps:

1. Bolts used for replacement must be class A2-80 or better according to EN/ISO 3506-1.
2. The pump must not run dry.
3. Make sure the permanently attached cable is suitably mechanically protected and terminated in a suitable terminal board placed outside the potentially explosive area.
4. The thermal protector in the stator windings has a rated cutout temperature of 150 °C guaranteeing the disconnection of the power supply.
5. The IP68 rating is limited to maximum 10 m submersion depth.
6. The temperature range is limited to -20 to +40 °C for ambient temperature and 0-40 °C for liquids.
7. Contact the manufacturer regarding the "d" protection type for pumps and for information on the dimensions of the flameproof joints.
8. The lock nut of the cable connector must only be replaced with an identical one.

Approvals

All versions have been approved by TÜV Rheinland LGA (notified body under the Construction Products Directive) according to EN 12050-1 as specified on the pump nameplate.

Approval standards

The explosion-proof versions have been approved by DEKRA according to the ATEX directive.

The explosion protection classification of the pumps is Europe CE 0344 Ex II 2 G Ex db h ib IIB T4 Gb.

Australia

For IEC countries, such as Australia and others, the explosion-proof versions have been approved by DEKRA, certificate no. IECEx DEK 11.0026X.

The explosion protection classification of the pumps is Ex db h ib IIB T4 Gb based on IEC 60079-0:2017 and IEC 60079-1:2014, IEC 60079-11:2011, ISO 80079-36:2016, ISO 80079-37:2016.

Safety instruction and requirements**DANGER****Electric shock****Death or serious personal injury**

- Before starting work on the pump, make sure that the fuses have been removed or the main switch has been switched off.
- Make sure that the power supply cannot be accidentally switched on.

**CAUTION****Crushing of hands****Minor or moderate personal injury**

- Do not put your hands or any tool into the pump inlet or outlet port after the pump has been connected to the power supply, unless the pump has been switched off by removing the fuses or switching off the main switch.
- Make sure that all the rotating parts have stopped moving.

CAUTION**Sharp element**

Minor or moderate personal injury

- Do not touch the sharp edges of the impeller, grinder head, and grinder ring without wearing gloves.

CAUTION**Biological hazard**

Minor or moderate personal injury

- Make sure to seal the pump outlet properly when fitting the outlet pipe, otherwise water might spray out of the sealing.

CAUTION**Hot surface**

Minor or moderate personal injury

- Do not touch the surface of the pump while the pump is running.

WARNING**Crushing of hands**

Death or serious personal injury

- When lifting the pump, make sure your hand is not caught between the lifting bracket and the hook.

DANGER**Crushing hazard**

Death or serious personal injury

- Make sure that the hook is fixed properly to the lifting bracket.
- Always lift the pump by its lifting bracket or by means of a forklift truck if the pump is fixed on a pallet.
- Never lift the pump by means of the power cable, hose or pipe.
- Make sure that the lifting bracket is tightened before attempting to lift the pump. Tighten if necessary.

DANGER

Electric shock

Death or serious personal injury

- Before installing the pump and starting it up for the first time, check the power cable for visible defects to avoid short circuits.
- If the power cable is damaged, it must be replaced by the manufacturer, his service agent or a similarly qualified person.
- Make sure that the product is earthed properly.
- Switch off the power supply and lock the main switch in position 0.
- Switch off any external voltage connected to the product before working on it.

CAUTION

Biological hazard

Minor or moderate personal injury

- Flush the pump thoroughly with clean water and rinse the pump parts in water after dismantling.
- Pits for submersible sewage and wastewater pumps may contain sewage or wastewater with toxic and/or disease-causing substances.
- Wear appropriate personal protective equipment and clothing.
- Observe the local hygiene regulations in force.

CAUTION

Pressurised system

Minor or moderate personal injury

- As pressure may have built up in the oil chamber, do not remove the screws until the pressure has been fully relieved.

Except for service on the pump parts, all other service work must be carried out by Grundfos or a service workshop authorised by Grundfos and approved for servicing explosion-proof products.

A possible replacement of the power cable must be carried out by Grundfos or a service workshop authorised by Grundfos.

Contaminated pumps

CAUTION

Biological hazard

Minor or moderate personal injury

- Flush the pump thoroughly with clean water and rinse the pump parts in water after dismantling.

Maintenance schedule

Inspect pumps running normal operation every 3000 operating hours or at least once a year. If the dry-solids content of the pumped liquid is very high or sandy, check the pump at shorter intervals.

Check the following points:

- Oil level and oil condition**
When the pump is new or after replacement of the shaft seal, check the oil level after one week of operation.
Use Shell Ondina X420 oil or similar type.
- Cable entry**

Make sure that the cable entry is watertight and that the cable is not sharply bent and/or pinched.

- Pump parts**

Check the impeller, the pump housing, etc. for possible wear. Replace defective parts.

- Ball bearings**

Check the shaft for noisy or heavy operation by turning the shaft by hand. Replace defective ball bearings.

A general overhaul of the pump is usually required in case of defective ball bearings or poor motor function. This work must be carried out by Grundfos or a service workshop authorised by Grundfos.

- Grinder system and parts**

In case of frequent choke-ups, check the grinder system for visible wear. When worn, the edges of the grinding parts are round and worn. Compare with a new grinder system.

Oil check and oil change

Every 3000 operating hours or at least once a year, change the oil in the oil chamber as described below. If the shaft seal has been changed, change the oil as well.

The table below states the quantity of oil in the oil chamber:

Pump type	Quantity of oil in the oil chamber [l]
SEG AUTO _{ADAPT} up to 1.5 kW	0.17
SEG AUTO _{ADAPT} 2.6 to 4.0 kW	0.42

Draining of oil

CAUTION

Pressurised system

Minor or moderate personal injury

- As pressure may have built up in the oil chamber, do not remove the screws until the pressure has been fully relieved.

Dispose of used oil in accordance with local regulations.

Cleaning the sensors

To avoid damaging the sensors, do not use other cleaning aids than those mentioned in these instructions.

Checking the functionality of the dry-running sensors

1. Cover one dry-running sensor with a wet cloth.
2. Let the pump run and pump down to the dry-running level.
– The pump must stop at the dry-running level.
3. Repeat this check with the other sensor.

Cleaning intervals for explosion-proof pumps

 Cleaning intervals of the sensors in explosion-proof pumps are mandatory in order to ensure that the pump is working correctly.

After cleaning, both dry-running sensors must be checked individually for proper functioning.

 If the dry-running sensors are not functioning properly, there is a risk of dry-running of the hydraulic part of the pump, which can provoke ignition.

The following table lists the required cleaning intervals for sensors in explosion-proof pumps.

Wastewater containing grease	Wastewater containing dry solid matter or fibres	Wastewater without grease, dry solid matter or fibres
3 months	6 months	6 months

Replacing the grinder system

CAUTION

Sharp element

Minor or moderate personal injury

- Do not touch the sharp edges of the impeller, grinder head, and grinder ring without wearing gloves.

During service the painted surface may be damaged. Remember to restore the painted surface by applying new paint.

Make sure that the grinder ring does not get stuck against the grinder head.

Fault finding

Observe all regulations applying to pumps installed in potentially explosive environments.

Make sure that no work is carried out in potentially explosive atmosphere.

Before attempting to diagnose any fault:

- Make sure that the fuses have been removed or the main switch has been switched off.
- Make sure that the power supply cannot be accidentally switched on.
- Make sure that all rotating parts have stopped moving.

Megging

Do not meg AUTO_{ADAPT} pumps as this may damage the built-in electronics.

Disposing of the product

This product or parts of it must be disposed of in an environmentally sound way:

1. Use the public or private waste collection service.
2. If this is not possible, contact the nearest Grundfos company or service workshop.

The crossed-out wheelie bin symbol on a product means that it must be disposed of separately from household waste. When a product marked with this symbol reaches its end of life, take it to a collection point designated by the local waste disposal authorities. The separate collection and recycling of such products will help protect the environment and human health.

See also end-of-life information at www.grundfos.com/product-recycling.

Declaration of conformity

GB: EC/EU declaration of conformity

We, Grundfos, declare under our sole responsibility that the product SEG AUTO_{ADAPT}, to which the declaration below relates, is in conformity with the Council Directives listed below on the approximation of the laws of the EC/EU member states.

CZ: Prohlášení o shodě EU

My firma Grundfos prohlašujeme na svou plnou odpovědnost, že výrobek SEG AUTO_{ADAPT}, na který se toto prohlášení vztahuje, je v souladu s níže uvedenými ustanoveními směrnice Rady pro sbližení právních předpisů členských států Evropského společenství.

DK: EF-/EU-overensstemmelseserklæring

Vi, Grundfos, erklærer under ansvar at produktet SEG AUTO_{ADAPT} som erklæringen nedenfor omhandler, er i overensstemmelse med Rådets direktiver der er nævnt nedenfor, om indbyrdes tilnærmedelse til EF-/EU-medlemsstaternes lovgivning.

ES: Declaración de conformidad de la CE/UE

Grundfos declara, bajo su exclusiva responsabilidad, que el producto SEG AUTO_{ADAPT} al que hace referencia la siguiente declaración cumple lo establecido por las siguientes Directivas del Consejo sobre la aproximación de las legislaciones de los Estados miembros de la CE/UE.

FR: Déclaration de conformité CE/UE
