1. General information

Read this document before you install the product. Installation and operation must comply with local regulations and accepted codes of good practice.

2. Symbols used in this document

WARNING

If these safety instructions are not observed, it may result in personal injury.

Caution

If these safety instructions are not observed, it may result in malfunction or damage to the equipment.

Note

Notes or instructions that make the job easier and ensure safe operation.

3. Product information

WARNING

- Prior to installation, read the installation and operating instructions of the relevant CIM module and of the DDA dosing pump.

3.1 Applications

The Grundfos E-Box 150 (E-Box = Extension Box) must only be used as a communication interface between a SMART digital DDA dosing pump and a Profibus® network.

The E-Box 150 contains a CIM 150 module (CIM = Communication Interface Module).

For internal communication between the E-Box and the dosing pump, GENibus is used.

4. Installation

4.1 Installation kit

The E-Box package contains these parts:

- E-Box equipped with CIM module
- Installation and operating instructions for the E-Box
- Installation and operating instructions for the CIM module

- CD-ROM (software, functional profiles, installation and operating instructions).

Note

Keep the CD-ROM and the installation and operating instructions so that they are easy to find when the E-Box with CIM module has to be integrated into the main communications network.

4.2 Electrical connection

The electrical connection must only be carried out by an authorised electrician in accordance with local regulations.

Warning

Before beginning the electrical connection, make sure that the power supply of the DDA dosing pump has been switched off, and that it cannot be accidentally switched on.

Warning

To ensure enclosure class IP65 / NEMA 4X, all unused connections have to be fitted with a blind plug!

Supply voltage of the E-Box: 30 VDC from DDA pump. See fig. E-box overview, pos. 4.

Caution

Connect E-box to power supply only via the DDA pump using the pre-assembled plug!

To ensure a stable and reliable communication, the cable screen for GENIbus connection must always be connected to the earth clamp. This is pre-assembled by Grundfos.

Caution

See fig. E-box overview, pos. 4. Do not make any changes!

4.2.1 Connection of Profibus

Note

Depending on the local network installation, one or two cables can be connected to the Profibus connections (fig. [Cable connections](#), pos. 1 and 2).

1. Remove cover from E-Box.

2. Prepare Profibus cable(s) as shown in fig. [Preparation of Profibus cables](#).

TM048440

Preparation of Profibus cables

See fig. [Cable connections](#).

3. Connect the red conductor(s) to terminal B (pos. 5).
4. Connect the green conductor(s) to terminal A (pos. 6).
5. Connect cable screens to earth via the earth clamps (pos. 7).
6. If necessary, connect earth conductor to functional earth terminal (pos. 8) at earth connection (pos. 3) and tighten clamp (pos. 9).
7. Fit housing cover and tighten screws.
 - Make sure that the gasket is positioned correctly.

TM048441

Cable connections

The Profibus address is set via DDA pump menu. Therefore the rotary switches (fig. [Cable connections](#), pos. 10) have been deactivated from factory.

Note

The LED (fig. [Cable connections](#), pos. 11) indicates the status of GENIBus connection.

Note

The LED (fig. [Cable connections](#), pos. 12) indicates the status of Profibus connection.

For further information (e.g. setting of termination resistors) see installation and operating instructions of the CIM 150 module.

4.2.2 Connection of power supply and GENIBus

Prior to connection of power supply and GENIBus, execute the mechanical installation.

1. Switch off the power supply of the DDA dosing pump (pos. 1).
 - Wait for approx. 20 seconds before executing the next step.
2. Remove protective cap from BUS input of the pump.
3. Connect plug (pos. 4) thoroughly to BUS input of the pump.

TM048442

Connecting E-Box to DDA

Start-up procedure and wiring diagram of plug, see installation and operating instructions of the DDA dosing pump.

Note

The functional profile can be found on the product CD delivered with the E-Box.

Related information

[4.3 Mechanical installation](#)

4.3 Mechanical installation

The E-box is always mounted below the pump regardless of the pump's mounting position (e.g. wall or tank mounted).

1. Place pump on E-Box.
 - Make sure that the clamps of the E-Box housing cover engage at pump housing (detail 1).
 - Insert locking device (pos. 5) at pump housing (detail 2).
2. Tighten screw (pos. 4) to lock connection (detail 3).

Mounting pump on E-Box

For horizontal installation, the E-Box can be mounted on the mounting plate of the DDA dosing pump.

6. Cleaning

The E-Box must only be cleaned with a dry and clean cloth.

7. Disposing of the product

This product or parts of it must be disposed of in an environmentally sound way:

1. Use the public or private waste collection service.
2. If this is not possible, contact the nearest Grundfos company or service workshop.

See also end-of-life information at www.grundfos.com/product-recycling.

The crossed-out wheellie bin symbol on a product means that it must be disposed of separately from household waste. When a product marked with this symbol reaches its end of life, take it to a collection point designated by the local waste disposal authorities.

The separate collection and recycling of such products will help protect the environment and human health.
