Commissioning
GRUNDFOS COMMISSIONING FOR ME IS
TOP PERFORMANCE FROM DAY ONE
Would you like to achieve peak performance?
A Grundfos Commissioning is a thorough inspection of your installation. Grundfos specialists make sure that your system and pumps are fully compatible, that all pumps are installed and aligned correctly, and that the system is ready to go.
Our specialists can commission virtually any type of pump system, ensuring efficiency and productivity.

GRUNDFOS COMMISSIONING

During a Commissioning, experienced Grundfos personnel take into account all factors relevant to your installation. The result? When the system is started up, you can rest assured that it is running at peak performance and that it has been installed correctly in every detail.
A Grundfos Commissioning also ensures that the pumps are running as energy efficiently as possible, giving you energy savings from day one.

Benefits of Grundfos Commissioning

- Optimum performance
- Minimum wear and tear
- Great flexibility in organising and carrying out the Commissioning
- Warranty period for the pump commences on the day of Commissioning *

Planned and carried out to your complete satisfaction

"The process of selling the Commissioning of our new pumping station to my customer was very aligned together with the Grundfos sales and service people. We reached an exact agreement on the conditions and specifications for executing the Commissioning. On the agreed day of Commissioning, two dedicated Grundfos service technicians showed up, and by the end of the day the pumping station system was running without trouble, and my customer was trained in handling the system."

Contractor responsible for municipal waste water pumping station, Finland

GRUNDFOS COMMISSIONING IN A FEW SIMPLE STEPS

1. Quotation is prepared
2. Commissioning is carried out with minimal disruptions to your operations
3. You receive a report on the work and recommendations
