Inspection

GRUNDFOS INSPECTION FOR ME IS **A FULL OVERVIEW OF EQUIPMENT CONDITIONS**

Are you missing out on opportunities to enhance efficiency?

With a Grundfos Inspection, all equipment in scope is analysed according to customised checklists by experienced personnel. The Inspection results in a final report providing you with a complete overview of equipment conditions and suggestions for actions that can be taken to optimise your installation, if any are detected.

GRUNDFOS INSPECTION

The Grundfos Inspection is a thorough examination of the equipment in scope. Experienced Grundfos specialists provide a report with an overview of how each piece of equipment in scope can be adjusted to ensure optimal performance, if relevant.

Benefits of the Grundfos Inspection

- Clear overview for easier installed base management
- Condition status with recommendations for remedial service, if needed
- Knowing equipment status makes it easier to plan maintenance budget

GRUNDFOS INSPECTION IN A FEW SIMPLE STEPS

1. We agree on and confirm installed base to be inspected
2. Grundfos personnel visits your facility to carry out the Inspection
3. You receive the final report giving you an overview of installed base condition and recommendations for further actions, if necessary
